## ABOUT ME

I'm a highly motivated mid-level Frontend Developer with over two years of experience building responsive, user-friendly web applications. I started coding as a hobby in 2016, and in 2022, I began focusing on JavaScript and frontend development.

Since then, I've worked on many freelance projects. I care a lot about clean UI, good performance, and simple user experiences.

Right now, I'm working at Tavana, where I've grown as both a developer and a teammate—going deeper into the React ecosystem and getting better at using Next.js, Tailwind, and team workflows.

## EXPERIENCE

### • Tavana

November 2024 – Present

Frontend Developer

Tehran, Iran

- Improved my teamwork skills and learned to work better in a team environment.
- Got deeper experience with Next.js and modern frontend tools.
- Helped build and improve fast, scalable components for an online store.

### • Tavana Store (E-commerce Platform):

Tavana

Tools: Next.js 14, Tailwind CSS, i18n, Swiper.js

- Refactored the whole Tavana Store website to make it faster, easier to manage, and better for users.
- Added multi-language support (i18n) so users can switch between different languages.
- Used Swiper.js and Tailwind to improve design and make sliders more responsive on all devices.

### • Blueprint

March 2024 - November 2024

Frontend Developer

Tehran, Iran

During my time at this company, I faced challenges like learning **React Native**, **Redux**, and **Zustand**, and successfully completed **five projects**, with three currently active. Key projects include:

#### • Pax Cast:

Blueprint

tools:

- A platform for medical imaging centers where patients can view images and reports, and centers can manage their services easily.

#### • Marvel Quiz:

Blueprint

tools:

- A quiz platform where users can browse and buy exams, upload PDFs, add questions, and review answers. Exams can have multiple booklets with online answer sheets.

#### • One Coach:

Blueprint

tools:

- A web app for coaches and trainees. Coaches can manage training sessions, and trainees can view exercises, watch videos, and mark sessions complete.

#### • VPN Client:

Blueprint

tools:

- A mobile app for secure VPN connections using manual settings or QR codes.

#### • Trust Pilot (Iranian Version):

Blueprint

tools:

- A platform to find, review, and rate businesses, and read others' reviews.

These projects helped me improve my technical skills .

FREELANCE PROJECTS
