SUMMARY

Frontend developer, 4+ years with React, Next.js and TypeScript. Most of my work has been on page speed and component libraries. At Tavana (20,000+ daily users) I took our Lighthouse score from 62 to 91 and built a UI library of 40+ components that 4 of our products use.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML, CSS

Frameworks: React, Next.js (App Router)

State & Data: React Query (TanStack Query), Redux Toolkit, Zustand, REST APIs

Styling & UI: Tailwind CSS, Storybook, Responsive Design

Libraries: React Hook Form, Zod

Performance: SSR/SSG, Code Splitting, Lighthouse

Tooling & Workflow: Git, CI/CD, Sentry

AI & Agents: LLM APIs (OpenAI, Anthropic), Tool Calling, MCP, RAG, Context Engineering, AI Coding Agents (Claude Code, Cursor)

WORK EXPERIENCE

Frontend Developer

Tavana — October 2024 – October 2026 | Tehran, Iran

tavanastore.ir: e-commerce site with **20,000+ daily users**. Next.js App Router, React, TypeScript and Tailwind CSS.

- Took our Lighthouse performance score **from 62 to 91** by moving key pages to SSR/SSG, splitting bundles and optimizing images.
- Built **40+ components** for our internal UI library, including form inputs with React Hook Form and Zod. They're documented in Storybook and used in 4 of our products.
- Moved server data to React Query and kept client state in Redux Toolkit and Zustand. Redundant API calls dropped by **about 35%**.
- Set up Sentry with alerts. We fixed production bugs **about 40% faster** after that.
- Added CI checks (lint, types, build) on every pull request. Each PR also got its own preview deploy for design and QA.

Frontend Developer

Bluprint — October 2023 – October 2024 | Tehran, Iran

Three production React apps using Redux, Zustand and REST APIs.

- Made **25+ responsive components** that all three apps shared. New pages took **about 30%** less time to build.

Pax Cast: medical imaging portal for patients and **7 imaging centers**.

- Built the patient scan viewer. Scans were large, so I loaded images progressively and only when they were needed.

Marvel Quiz: online exams with multiple booklets, used by **600 students**.

- Added autosave to the exam flow. Answers were saved in the browser and synced to the server in the background. Students didn't lose answers when they refreshed or lost connection.

One Coach: training management for **300+ coaches** and their trainees.

- Wrote the session scheduling, including checks for overlapping bookings and time zone handling.

Frontend Developer

Freelance — 2022 – 2024 | Remote

- Built **6+ web apps** for clients with React, Next.js and TypeScript, including an admin dashboard for a logistics company and a booking site for a beauty clinic.
- Ran each project on my own, from the first call with the client to hosting it.

EDUCATION

Master's Degree in Software Engineering
Azad University 2023 – Present | Tehran, Iran

Bachelor's Degree in Computer Science
Semnan University 2017 – 2022 | Semnan, Iran

CERTIFICATIONS

Front-End Bootcamp, Quera

LANGUAGES

Persian: Native
English: Intermediate (B1–B2)
