SUMMARY

Frontend developer with 4+ years of experience in React, Next.js and TypeScript. Until October 2026 I was at Tavana, working on an e-commerce site with around 20,000 daily users. I built our component library, moved data fetching to React Query and got our Lighthouse score from 62 to 91. Before that I spent a year at Bluprint on a medical imaging portal, an online exam platform and a coaching app, and I've done freelance work for small businesses since 2022.

EXPERIENCE

Frontend Developer

Tavana October 2024 – October 2026 Tehran, Iran

tavanastore.ir – *e-commerce platform (Next.js App Router, React, TypeScript, Tailwind CSS) with **20,000+ daily users**.*

- Built **40+ components** for our internal UI library, including form inputs with React Hook Form and Zod. They're documented in Storybook and used in 4 of our products.
- Moved server data to React Query and kept client state in Redux Toolkit and Zustand. Redundant API calls dropped by **about 35%**.
- Took the Lighthouse performance score **from 62 to 91** with SSR/SSG on key pages, bundle splitting and image optimization.
- Set up Sentry with alerts. We fixed production bugs **about 40% faster** after that.
- Added lint, type-check and build checks to CI for every pull request, plus a preview deploy per PR for design and QA to review.

Frontend Developer

Bluprint October 2023 – October 2024 Tehran, Iran

Three production apps, all React with Redux, Zustand and REST APIs.

- Built **25+ responsive components** shared by the three apps, which cut the time to build a new page by **about 30%**.

Pax Cast – *medical imaging portal for patients and **7 imaging centers***

- Built the patient scan viewer. Scans are large, so images load progressively and only when needed.

Marvel Quiz – *online exams with multiple booklets, used by **600 students***

- Built the exam flow with autosave. Answers are kept in the browser and synced to the server in the background, and a refresh or dropped connection doesn't lose anything.

One Coach – *training management for **300+ coaches** and their trainees*

- Built session scheduling, with checks for overlapping bookings and time zone handling.

Frontend Developer

Freelance 2022 – 2024 Remote

- Built **6+ web apps** for clients with React, Next.js and TypeScript, among them an admin dashboard for a logistics company and a booking site for a beauty clinic.
- Ran each project on my own, from the first call with the client through UI, API integration and hosting.

SKILLS

Languages	**TypeScript** **JavaScript (ES6+)**
Frameworks	**React** **Next.js (App Router)**
State & Data	**React Query (TanStack Query)** **Redux Toolkit**
Styling & UI	**Tailwind CSS** **Storybook**
Libraries	**React Hook Form** **Zod**

Tooling & Workflow

Git Sentry

AI & Agents

LLM APIs (OpenAI, Anthropic) Tool Calling MCP RAG Context Engineering
AI Coding Agents (Claude Code, Cursor)

EDUCATION

Master's Degree in Software Engineering

Azad University

2023 – Present Tehran, Iran

Bachelor's Degree in Computer Science

Semnan University

2017 – 2022 Semnan, Iran

CERTIFICATIONS

Front-End Bootcamp, Quera

LANGUAGES

Persian — Native
English — Intermediate (B1–B2)
