SUMMARY

Frontend developer with 4+ years of experience building web apps in React, Next.js and TypeScript. At Tavana I work on an e-commerce platform used by 20,000+ people a day. I build and maintain our component library, handle data fetching and state with React Query, Redux Toolkit and Zustand, and work on page speed. Before that I built a medical imaging portal, an online exam platform and a coaching app at Blueprint, and took on freelance projects for small businesses.

WORK EXPERIENCE

Frontend Developer

Tavana

October 2024 – Present | Tehran, Iran

- Develop and maintain Tavana's e-commerce platform (Next.js App Router, React, TypeScript, Tailwind CSS), used by **20,000+ people every day**.
- Built 40+ components for our internal UI library, including inputs and form elements with React Hook Form and Zod validation, documented in Storybook and used in 4 products.
- Moved server data to React Query (caching, pagination, optimistic updates) and kept client state in Redux Toolkit and Zustand, which cut redundant API calls by about 35%.
- Raised the Lighthouse performance score from 62 to 91 and improved Core Web Vitals by rendering key pages with SSR/SSG, splitting bundles and optimizing images.
- Set up Sentry error monitoring and alerts, so the team now finds and fixes production bugs about 40% faster.
- Work with backend developers and designers (Figma) on new features, review pull requests and maintain the CI/CD pipeline.

Frontend Developer

Blueprint

October 2023 – October 2024 | Tehran, Iran

- Worked on three production projects using React, Redux, Zustand and REST APIs:
 - Pax Cast** (medical imaging): built the patient portal for viewing scans and reports, and the service management panel used by 7 imaging centers.
 - Marvel Quiz** (online exams): built the multi-booklet exam flow with online answer sheets, exam purchase, and question and PDF management, used by 600 students.
 - One Coach** (training management): built exercise management, video lessons, session scheduling and progress dashboards for 300+ coaches and their trainees.
- Built a set of 25+ responsive components shared by all three projects, which made new pages about 30% faster to build.

Frontend Developer

Freelance

2022 – 2024 | Remote

- Built 6+ web apps for clients with React, Next.js and TypeScript, including an admin dashboard for a logistics company and a booking site for a beauty clinic.
- Handled each project from the first requirements call to deployment: UI, REST API integration and hosting.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks: React, Next.js (App Router), SSR, SSG, ISR

State & Data: React Query (TanStack Query), Redux Toolkit, Redux, Zustand, REST APIs

Styling & UI: Tailwind CSS, Material UI, HeroUI (NextUI), Framer Motion, Responsive Design, Design Systems

Libraries: React Hook Form, Zod, Storybook, i18next, Swiper.js

Tooling & Workflow: Git, GitHub, GitLab, CI/CD, Sentry, Figma, Code Review, Agile

AI & Agents: Claude Code, Cursor, MCP (GitHub, Figma), AI-assisted code review, OpenAI and Anthropic APIs

EDUCATION

Master's Degree in Software Engineering

Azad University

2023 – Present | Tehran, Iran

Bachelor's Degree in Computer Science

Semnan University

2017 – 2022 | Semnan, Iran

CERTIFICATIONS

Front-End Bootcamp, Quera

LANGUAGES

Persian: Native

English: Intermediate (B1–B2)
