SUMMARY

Frontend Developer with 4+ years of experience building production web applications with React, Next.js, TypeScript, and Tailwind CSS. Experienced in developing reusable UI systems, integrating REST APIs, managing application state with Redux and Zustand, and building responsive, maintainable interfaces.

Currently working at Tavana, contributing to production applications in a collaborative development environment with a focus on performance, usability, and scalable frontend architecture.

EXPERIENCE

Frontend Developer

Tavana

November 2024 – Present Tehran, Iran

- Develop and maintain Tavana's e-commerce platform serving **20,000+ daily users**, built with Next.js (App Router), React, TypeScript, and Tailwind CSS.
- Built 40+ components for the internal UI library and design system — inputs, form elements (React Hook Form + Zod), validation states, and error handling patterns — documented in Storybook and reused across 4 products.
- Managed server state with React Query (TanStack) — caching, pagination, and optimistic updates — and client state with Redux Toolkit and Zustand, reducing redundant API calls by ~35%.
- Improved Core Web Vitals through SSR/SSG, code splitting, and image optimization, raising the Lighthouse performance score from 62 to 91.
- Integrated Sentry for error monitoring and alerting, cutting the time to detect and fix production bugs by ~40%.
- Worked with backend and design teams (Figma) to deliver features end to end, reviewed pull requests, and maintained CI/CD pipelines for automated build and deployment.

Frontend Developer

Blueprint

March 2024 – November 2024 Tehran, Iran

- Delivered features across three production projects using React, Redux, Zustand, and REST APIs:
 - Pax Cast** — Medical imaging platform. Built the patient portal for viewing images and reports and the service management panel used by 15+ imaging centers.
 - Marvel Quiz** — Online exam platform. Built the multi-booklet exam flow with online answer sheets, exam purchasing, and question/PDF management for 5,000+ students.
 - One Coach** — Training management platform. Built exercise management, video lessons, session scheduling, and progress tracking dashboards for 300+ coaches and their trainees.
- Built a shared library of 25+ responsive components reused across all three projects, cutting new-page development time by ~30%.

Frontend Developer

Freelance

2022 – 2024 Remote

- Built 6+ web applications for clients using React, Next.js, and TypeScript, including an admin dashboard for a logistics company and a booking website for a beauty clinic.
- Worked directly with clients from requirements to delivery, handling UI implementation, REST API integration, and deployment.

SKILLS

Languages

TypeScript JavaScript (ES6+) HTML5 CSS3

Frameworks

React Next.js (App Router) SSR / SSG / ISR

State & Data

React Query (TanStack) Redux Toolkit Redux Zustand REST APIs

Styling & UI
